

SAHIR ANJUM

Software Development Specialist | AI Tech Lead | Data Engineer

sahiranjum2702@gmail.com | Mo: +91 - 7275405244 | [LinkedIn](#) | [Website](#) | Location: Pune, India

PROFESSIONAL SUMMARY

7 years delivering data engineering solutions in the Telecom domain, with a strong base in ETL, SDLC, unit and system testing. Proficient in Azure Databricks, Data Factory, Snowflake, PySpark, Python, SQL, and Control-M. Actively building GenAI experience.

SKILLS

- Azure Databricks, Datafactory, Azure Devops, Snowflake
- **Tools:** Control-M, DBT, BMC Helix, Tableau, Unix
- **Languages:** SQL, Pyspark, Python
- **AI Tools:** Cursor (Agents, skills, rules), Obsidian

EXPERIENCE

Amdocs | Software Development Specialist (Data and Gen-AI) NOV 2025 – Present | Pune, India

- Tech Lead for Singtel (Singapore Telecommunications Limited) on the Unified Data Platform.
- Worked onsite in Singapore with Singtel stakeholders on migration plan, delivery risks, and cutover approach.
- Created data migration solution from oracle on-prem to databricks, including **unity catalog**, spark declarative pipe (**sdp/ dlt**), **lakeflow jobs**.
- Implemented **Lakebridge Converter**- oracle legacy code transpiled to Pyspark/spark SQL notebooks, supporting components like Informatica converter, SQL cleanup utilities, parameter-substitution SQL preprocessor.
- Delivered file and CDC-style ingest into Delta using SDP, with a custom quality-control layer on an SDP-core cluster (~1.5× lower compute cost).
- Setting up databricks and bitbucket MCP in cursor to automate and expedite the transformation, standardization and version control of notebooks.
- Orchestrated 1,200+ notebooks in Lakeflow: cached global job parameters (cut runtime ~20%), instance pools, and parallel waves to hit SLA.
- Code deployment via databricks asset bundle (**DAB**) and **CI/CD** across various environments.
- PII, HMAC and masking policy in unity catalog over sensitive data.
- Contributed to a project-wide Cursor harness (skills, rules, notebook layout) to cut token waste and keep new development activities as per the standard.
- Leading the design and implementation of UberAgent, an in-house multi-agent GenAI platform. Architecture: an intelligent Supervisor agent + specialized Workers (SQL Worker, Lineage Worker, Code Converter), orchestrated via Azure OpenAI (GPT-4o) and FastAPI.

Amdocs | Data Engineer

MAR 2022 – NOV 2025 | Pune, India

- Data engineer for Hutchison 3G UK Limited (Three UK).
- Worked onsite at client location in Reading, UK. to understand business requirements, collaborated with cross-functionals team and delivered actionable insights.
- Creating an end-to-end process for data migration from on-prem databases to **snowflake**.
- Development of data pipelines using Azure Datafactory, delta live tables and databricks notebooks
- Data transformation using **pyspark**, **python scripts** and **SQL** as per business requirement.
- Creating and scheduling tasks in Databricks, snowflake and control-M, Email alerts automation using Azure logic apps, snowflake and databricks.
- Contribution in Requirement Analysis, Incidents, Defects, CRs and Work Orders tracking using Octane, BMC helix and JIRA.
- Managing Azure database for incoming and outgoing data files including lifecycle management.

- Code management using Azure devops and perforce.
- Building data models using DBT to migrate data between databases and warehouses.
- Design and development of **dashboards using Tableau**.

Infosys Ltd. | System Engineer

AUG 2019 - MAR 2022 | Pune, India

- Worked as software developer for - Spark NZ Limited, A New Zealand telecommunications and digital services company.
- Understood the requirement and functional specification of the project provided by the organization.
- Using Azure Datafactory and databricks to migrate data from oracle database to snowflake.
- Worked on Bug fixes, enhancements and job monitoring in control-M.
- Actively participated in scrum meetings and attended stand-up calls to understand the customer's requirements.
- Resolved issues and escalated problems with knowledgeable support and quality service.

Infosys Ltd. | Internship & Trainee

JAN 2019 - AUG 2019 | Pune, India

- Undergone Infosys Foundation Program which involves understanding Business Intelligence and its concepts using MSBI suite.
- PROJECT: Performance Report- This project was based on Power BI report, which required development of a data warehouse. The application allows the display and performs various activities based on performance of trainees at various levels of hierarchy.

ACCOMPLISHMENTS

- Databricks Certified Data Engineer Professional
- Got recognition in the department for providing automation solutions at Amdocs.
- Global Agile Certification by Infosys Ltd.

EDUCATION

- Pranveer Singh Institute of Technology (PSIT)

AUG 2015 – 2019 | Kanpur, India

University: Dr. A.P.J Abdul Kalam Technical University | 71.5 %
